

WidgetMakr: How to Add Multiple Source Codes to a Single Widget

Multiple Source Codes can now be used for an individual widget. This function not only saves time since you only need to create one widget that can be used across several landing pages, but it also helps you track the source of your donations on the WidgetMakr dashboard.

Create your Widget

1. Log into WidgetMakr and create a widget like normal.

2. After you click on the orange  button, you'll see the following page appear:

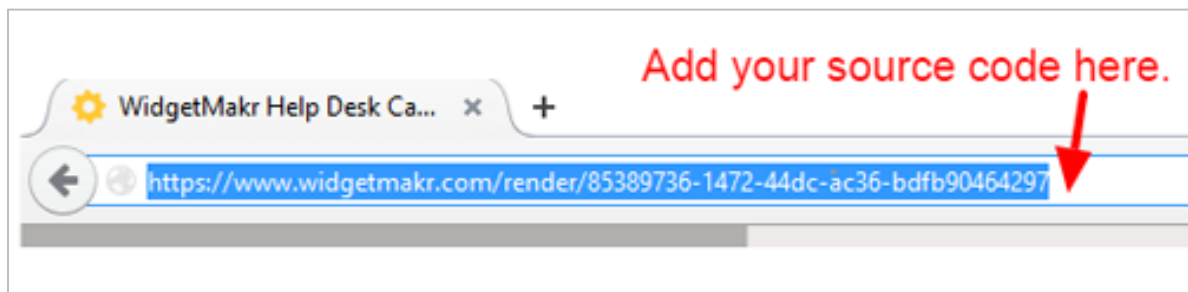

- a. If you want to link directly to the donation form, click on the blue type that says “**copy this link**” to open the link in a new browser tab.
- b. If you want to embed the form on your own hosted page, copy the embed code and add it to your website.

Apply the URL parameter to the Widget's Landing Page

The widget will use the **Source Code** applied to the widget during **Step 3** of its creation by default. To apply a different source code to that same widget, you'll want to take the following steps:

1. Go to the URL of the page with the widget (either your hosted page of the embedded widget or WidgetMakr's hosted page of the widget).
2. Type the following URL parameter, **?sc=YourCode**, to the end of the URL.
Examples of source codes could be "?sc=Facebook", "?sc=blog" or "?sc=homepage"

Once the source code has been added, your URL should look similar to the example below.

Ex: <https://www.widgetmakr.com/render/85389736-1472-44dc-ac36-bdfb90464297?sc=Facebook>

Once the URL parameter has been applied to your link, you are finished and can share the donation page link with your donors!

You can review the source codes that have been used by going to your **Widgets** dashboard.

Name	Email	Source Code	Amount	Submitted
Royer, Sweetie Details	sweetie@youremail.com	Facebook	\$25	4/9/2015 4:19 PM
Royer, Sunny Details	sunny@youremail.com	New Source Code	\$250	4/9/2015 4:17 PM
Rogers, Elise Details	erogers@youremail.com	DrudgeAd	\$50	4/9/2015 4:14 PM
Rogers, Elise Details	erogers@youremail.com	housefile4-9-15	\$100	4/9/2015 3:11 PM
